

clear choiceTM clean energy

Texas environmentally approved energy

What is Clear Choice clean energy?

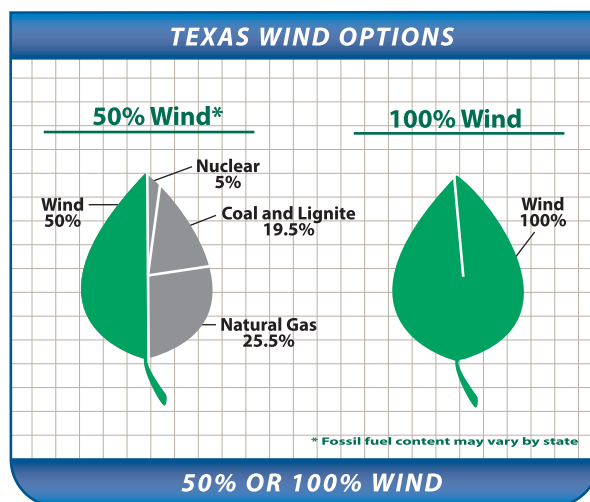

Clear Choice is Commerce Energy's clean energy program. It's what the name implies. Clear Choice clean energy is derived from natural energy sources such as wind. It is not derived from fossil fuels that pollute the environment.

Clear Choice clean energy offers you a broad and ever increasing selection of premium clean energy service plans. We are committed to clean energy products that meet the highest standards for natural and renewable energy. Add to that the rate security from our fixed-rate service plan and favorable prices, and ask yourself, "Why haven't I already enrolled?"

What are the Benefits?

By selecting Clear Choice clean energy, you will contribute to a healthier environment and reduce the emission of greenhouse gases — which will benefit us all.

Since 2001, Commerce Energy has taken the initiative to promote clean energy programs. Today, Commerce Energy complies with the highest standards in Texas, even though legislative issues have yet to be resolved to allow for actual certification by third-party consumer-protection groups. The future is clear with clean energy.

This product is right for you if:

- ⚙ You care about the environment
- ⚙ You want protection from the volatility of electricity prices
- ⚙ You demand the highest standards for natural and renewable energy
- ⚙ You need dependable energy from a name that you trust
