ARCHITECTURAL
FLOORING SYSTEMS

RAPID SET® ADVANCED CEMENT TECHNOLOGY

DURABILITY & BEAUTY Minimal Maintenance

When you want the most uniform and consistent polished concrete floor, TRU® Self-Leveling ensures the highest quality results on each and every flooring project. TRU is formulated with Rapid Set® Cement, giving you the best results not found elsewhere. TRU is ideal for floors that are stained, integrally colored, and decorative embedded aggregate flooring.

Why TRU® Self-Leveling?

- Specifically designed for polishing and decorative flooring applications
- Integral colors and aggregates allow for endless design possibilities
- Grinds and polishes extremely well – very little polymer means crystal clear floors (D.O.I. - Distinctive Of Image)
- Durable, one-component system
- 5000 psi (34.5 MPa) in 24 hours
- Foot traffic in 2-3 hours; coat with epoxy in 12 hours, ready for grinding in 24 hours
- More consistent flooring appearance (e.g. color, aggregate, polish, shine) and strength than traditional portland cement concrete
- Longest proven track record in polished overlays backed by years of testing
- Our floors are compliant with the National Floor Safety Institute (NFSI) and the American National Standard Institute (ANSI)

Formulated with Rapid Set Cement

TRU® is engineered with the technically advanced Rapid Set® Cement. With Rapid Set Cement, you deliver fast, strong and durable results that are better for our environment.

| | Rapid Set® Cement Concrete | Portland Cement Concrete |
|---------------------------------------|----------------------------------|--------------------------------|
| Structural strength | 1 hour* | 3 days |
| High traffic strength | 1 day | 28 days |
| Drying shrinkage | Reduced by 70% | Excessive |
| Cracking | Greatly reduced | Excessive |
| Sulfate attack | Resistant | Prone to |
| Alkali-silica reaction (ASR) | Resistant | Prone to |
| Carbon footprint | Reduced by 30% | Excessive |
| Lifetime (before needing replacement) | 80 years | 20-40 years |

* After final set

HIGH CLARITY FLOORS FAST FLOORING SOLUTION

With our complete fast track flooring system, you can create the ultimate polished floor.

Because TRU® contains just trace amounts of polymer, TRU gives you high-gloss polished concrete with more clarity. Achieve high quality, high clarity, polished floors in fewer steps.

Behind schedule? No problem. Our fast-track flooring system helps you bring jobs up to speed to meet deadlines.

ESTABLISHED PROVEN POLISHED OVERLAYS

Millions of square feet of concrete floors have been polished with TRU® flooring systems. TRU is the most established concrete overlay system across all sectors – commercial, industrial, retail and residential. TRU polished floors have been tested and have a lower slip coefficient of friction than other flooring systems. TRU meets or exceeds slip coefficient of friction by polished concrete industry standards. Building and facility owners trust TRU for their polished concrete floor needs.

NATURAL BEAUTY FROM POLISHED CONCRETE FLOORS

Concrete's tonal differences, subtle cracks and aggregates can take on a stone-like, natural feel. Polished concrete changes a concrete floor surface, with or without aggregate exposure or color, to achieve a specified level of gloss. TRU® makes it easy to design and specify functional and beautiful polished concrete floors.

Let your TRU creative ideas shine and sparkle in your floors. Use TRU with aggregate to resemble the look of terrazzo, or use the color chart to create unlimited options of colored polished floors.

In addition, create concrete gray floors that can be polished to expose the aggregate and simulate the appearance of polished concrete with TRU® Gray and TRU® PC Polished Concrete.

RENOWN TRAINING SUPPORT & RESOURCES

Our experts are skilled and experienced as former flooring contractors. They are on the forefront of architectural concrete floors, and know what contractors need to do to achieve the high quality, beautiful results you desire. Contractors who follow our flooring system have the highest rate of success.

TRU® has the largest preferred network of polishing contractors (and growing) ready to bring your vision to reality.

We are experienced in working on entire flooring systems with other manufacturers' equipment, tools and materials. This along with continuing education on the latest equipment, chemicals and trends, has made us the experts in the concrete flooring industry.
